**59<sup>th</sup>**  
Annual  
Production Sale

HH-ADVANCE 4-137M-ET

**MONDAY, MARCH 10, 2025**

*LUNCH 11:30 • SALE AT 12:30*

*AT THE RANCH IN VALIER, MONTANA*

## View and Bid on Holden Hereford's Sale Live Online

Go to [www.Live-Ag.com](http://www.Live-Ag.com) Click on the purebred tab at the top right of the screen and select the auction of choice. Log in or create an account. Once logged in, select the sale of choice and register to bid.

**For assistance, please call 817-533-6699 or Blake Tucker at 308-660-3963**

**IF YOU NEED ANY ASSISTANCE CALL  
SUPERIOR AT 1(800) 422-2117**

View the auction and the pre-recorded videos at [Bid.SuperiorLivestock.com](http://Bid.SuperiorLivestock.com)

**ONLINE BIDDING** Go to [Bid.SuperiorLivestock.com](http://Bid.SuperiorLivestock.com). If you have not registered before, you will need to create an account. If you have an account at LiveAuctions.tv you may skip the registration process and use those login credentials as LiveAuctions is a division of Superior Livestock. Select the auction you would like to bid on and click the "Request a Buyer Number" button.

**TURN IN BIDS OVER THE PHONE** This is Superior's traditional method of buying cattle and is the suggested process for anybody who does not have consistent, high-speed internet. You still must register an account at [Bid.SuperiorLivestock.com](http://Bid.SuperiorLivestock.com) and request a buyer number. Once you receive a buyer number you will see the bid line phone number. Watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on. A Superior Livestock representative will be with you on the phone and will assist you in placing bids.

Go to [www.LiveAuctions.tv](http://www.LiveAuctions.tv) You do NOT need an account to watch the auction, but you do need to register an account and request a buyer number if you wish to bid. Find the auction you are interested in on the homepage and you will be prompted to login. You will now see a hyperlink at the top that says "Request a Buyer Number".

**If you need help registering to bid or to view the auction please call**

**Technical Support at (682) 816-4900, Katie Colyer at 208-599-2962 or e-mail us at [TechSupport@LiveAuctions.tv](mailto:TechSupport@LiveAuctions.tv)**

**Buyers will be contacted by the ranch after the sale for payment and delivery details.**

### TERMS AND CONDITIONS

- ◆ All sale cattle have been parentage verified and DNA tested to be IE Free, HY Free, Dilutor Free, and MSUD Free by Neogen Labs.
- ◆ Each animal will be sold to the highest bidder without reservation.
- ◆ The auctioneer will settle any disputes as to bidding and his decision will be final.
- ◆ Terms of all sales will be cash unless arrangements are made between purchaser and seller prior to sale.
- ◆ Individual health papers will be furnished with each animal permitting shipment to any state.
- ◆ In case an adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit on the purchase of another animal.
- ◆ No adjustments will be made after nine (9) months of sale day on any animals.
- ◆ The animal becomes the property of the purchaser as soon as sold but it shall be the responsibility of the seller to see that animals are properly cared for until delivered to the purchaser.
- ◆ Any death or injury after the animal is sold is at the buyer's risk.
- ◆ Anyone attending this sale attends at their own risk and without liability on the part of the owners or their employees.
- ◆ Corrections or additions of any information contained in the sale catalog will be announced from the auction stand and will take precedence over any printed material.

This is our invitation for you to attend our 59th Annual Production Sale. On behalf of our operation, we welcome you to come and see what we feel is an exceptional sale offering. We feel the depth of quality in this group is outstanding. When we weaned the spring bulls last fall, we all felt like this was the best set of bulls that we had ever weaned. This sale offering is right for the times, and they are loaded with all the traits the beef industry demands. The feeder cattle market has been on fire for the last 12 months, and there has never been a better time to add quality genetics into your breeding program. All signs point to at least 2 more years of record prices so don't miss this opportunity to add some elite Hereford genetics to your breeding program.

It's hard to believe that it has been 59 years since the first Cooper-Holden Production sale that was held in 1967 in Great Falls, MT. We feel very blessed to still be involved in the Hereford business, and are very grateful for all the wonderful friends and customers we have had experiences with over these last 59 sales. The Hereford business has been really good to us over the years, and it is exciting to see the interest focused back on quality Hereford cattle out in the beef industry today. The data is in and Herefords continue to excel in all research programs for both heterosis and extra profit for your operation. We have enjoyed our part in working to produce Hereford cattle that will perform well in all segments of the beef industry, and we look forward to many more years of raising the best Herefords possible. As always, we plan on laying out the welcome mat with great hospitality and top quality Hereford cattle on display, and we truly hope you can join us at sale time.

Once again, we are pleased to offer an outstanding set of bulls that are uniform and predictable in quality, type, and breeding. This group represents the top 120 out of almost 150 bull calves born in our 2024 calf crop and almost 50% of them are the results of our extensive ET program. In addition, we are selling a tremendous set of powerful 18 month old bulls from our fall calving program. They are the top 60% of the fall 2023 calf crop, and we feel this is the deepest set of 18 month old bulls we have ever offered. They are a balanced trait set of bulls that combine thickness, performance, pigment, maternal strength, fleshing ability, carcass, disposition, eye appeal, and moderate birth weight. Almost 85% of the sale offering qualifies as sires for the Hereford Advantage program by being in the top 50% of the breed or higher on CHB\$ (\$122 and above), and over 65% of the sale offering ranks in the top 25% of the breed on MARB EPD and over 50% rank in the top 25% on WW, Milk, and CHB\$. Also, 100% of the sale offering have GE EPDs on them to improve the accuracy of their EPDs. We have embraced the use of Genomics in our herd to give our customers better EPD data on our cattle, and we have been genomic testing every animal since 2012. We are also proud to be recognized as a Platinum T.P.R. breeder by the AHA. The bulls will also sell with complete ultrasound and performance data and they have all passed a semen test by our vet. We also have a great set of elite Line One females in the sale again this year. There are 35 top quality Hereford heifers, and for the fourth year we will offer an extra fancy set of F1 black baldy open heifers in our sale. This year as a special addition, we will sell 60 head of commercial Hereford yearling heifers. We are also proud to have Double Bit Ranch join us again with a great set of bulls and heifers. All registered sale cattle have been DNA parentage verified and tested free for all known genetic defects except for the MD and DB defects. These defects are not present in Line One cattle and all sale cattle are guaranteed to be free from them. As always, all sale cattle sell fully guaranteed.

Our cow herd is Line One in breeding. We purchased our first Line One cattle over 70 years ago. Since then we have purchased and used many top sires from the Miles City Research Station. We have also exchanged and purchased top herd sires from Cooper Herefords. We have also selected top herd sire prospects from our own herd every year.

We were one of the first members of the Montana Beef Performance Association when it was organized in 1956 and were very active in it until it was dissolved. We have been involved with the TPR program of the American Hereford Association and are active participants in the Whole Herd Reporting Program. These records have been very important in selecting and maintaining the performance and quality of our cattle. We have a severe culling program for our mother cows. We cull on performance, fertility, soundness, udder quality, and milk. Our cattle are the product of many years of selection for these traits. Our cowherd is our pride and many of the top cows in the breed have come from our ranch.

We have stayed with a strong performance, multitrait line breeding program to enhance the predictability of our cattle for our customers. Our focus has always been on stacking generation after generation of the traits that add value to our customer's bottom line. A line breeding program can only succeed if you continually add cattle with superior genetics to it. The advantage of our program is the uniformity and predictability it provides along with the heterosis that can be generated by an outcross within the breed or between breeds. These bulls have generations of bred in performance and will pass these traits on to their progeny consistently.

The sale bulls and heifers and the cowherd will be on display March 8, 9, and 10th for your inspection. Lunch and snacks will be provided on both March 9th and sale day. There will be a social hour and steak dinner at Buffalo Joe's Steakhouse in Dupuyer on March 9th from 6:00-8:30 p.m.

If you are unable to attend the sale we will have three different options for internet bidding. You will be able to view and bid on LiveAg, Superior Livestock, and LiveAuctions.tv. We will start selling cattle promptly at 12:30 p.m. to try and get through all the sale lots in our allotted time. Videos of the sale cattle will be viewable at The Livestock Link and [www.holdenherefords.com](http://www.holdenherefords.com) along with LiveAg, Superior, and LiveAuctions.

Jack & Tresha Holden & family, Jay D. & Kelli Evans & family

[www.holdenherefords.com](http://www.holdenherefords.com)

## DELIVERY

We are offering free delivery to central points within 1,000 mile radius of our ranch on all purchases totaling \$5000 or more. Cattle will be delivered to anywhere in the continental U.S. but will be at buyer's cost after the first 1000 miles.

## ABSENTEE BIDDING

Anybody wishing to bid that cannot attend the sale or participate through Superior Livestock, LiveAuctions, or LiveAg may place a phone bid by calling any listed sale representative, Jack Holden, Jay D. Evans, Eric, or Brad. Please contact us if we can be of assistance in any way.

## TRAVEL AND ACCOMMODATIONS

Our ranch is 95 miles north of Great Falls, Montana. Great Falls has excellent air terminal service. Great Falls is served by Delta, United, and Alaska airlines.

We retained 2216K from our 2022 calf crop. He is a son of the 8123F cow that topped our 2020 Female Sale at \$47,500 and is now a donor for Topp Herefords. He has excellent thickness, length, and eye appeal and his first set of calves were top performers. Lots of balance and type in this young sire. **7 sons sell!**

## EXPLANATION OF BREED EPDS

### CALVING EASE- DIRECT (CED)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

### BIRTH WEIGHT (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

### WEANING WEIGHT (WW)

Weaning Weight (WW) WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

### YEARLING WEIGHT (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

### Scrotal Circumference (SCR)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a 0.7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.

### MATERNAL MILK EPD (MILK)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

### TEAT SIZE (TEAT)

TEAT EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

### RIBEYE AREA (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

### MARBLING (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

### BALDY MATERNAL INDEX (\$BMI)

The BMI\$ is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

### Certified Hereford Beef Index (\$CHB)

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Rib-eye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

# THE POWER OF GENOMICALLY ENHANCED EPDS

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. To the right is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

AHA TRAIT	ACCURACY IMPROVEMENT	EFFECTIVE PROGENY NUMBER INCREASE*
<b>CALVING EASE</b>	0.09	17
<b>BIRTH WEIGHT</b>	0.12	8
<b>WEANING WEIGHT</b>	0.14	12
<b>YEARLING WEIGHT</b>	0.16	9
<b>SCROTAL CIRCUMFERENCE</b>	0.17	6
<b>MATURE COW WEIGHT</b>	0.12	4
<b>UDDER SUSPENSION</b>	0.17	7
<b>TEAT SIZE</b>	0.17	7
<b>CARCASS WEIGHT</b>	0.11	3
<b>FAT</b>	0.08	2
<b>RIB-EYE AREA</b>	0.07	2
<b>MARBLING</b>	0.10	3

\* Effective Progeny Number Increase (EPNI). EPNI is the difference gained for genotyped animals versus non-genotyped animals.

Each animal tested is recognized with the AHA GE-EPD logo.

### YEARLING BULLS

This group of yearling bulls represents the top 75% of the bull calves born in our 2024 calf crop. When we weaned this set of bulls last fall, we felt like they were the best set we had ever put on feed. They have continued to excel since then and are a fantastic set of bulls. They combine EPDs, phenotype, performance, carcass, strength, and cow power, and we are extremely proud of the quality and uniformity in this group from top to bottom. They are stout made, well marked, long bodied and have top notch performance and ultrasound data to back it up. We have continued to add more carcass quality into our bulls while maintaining a proper phenotype and structure while always keeping a strong focus on economically important traits for our customers. They have all been semen checked and are ready to go to work for you. 100% of these bulls have AHA GE EPDs to increase the accuracy of their EPDs, and they also are all parentage verified. We invite you to look them over, and we feel that you will be very impressed with the consistency in type and kind in this powerful set of bulls. There are many full and 3/4 brothers in this group also, and almost 50% are ET calves from our extensive ET program.

The average EPDs on this group of bulls is

**CED +3.6 BW +2.3 WW +62 YW +94 Scrotal +1.2 Milk +31 M&G +62 TEAT +1.4 REA +.37 MARB +.27 BMIS 370 CHB\$ 135**

The average bull in our sale offering ranks as follows:

**Top 48% CED, Top 40% on BW, Top 30% WW, Top 40% YW, Top 25% Milk, Top 20% M&G, Top 12% TEAT, Top 18% MARB, and Top 25% on CHB\$**

This consistent quality across the board on EPDs and Profit Indexes shows our commitment to multi trait selection. Combine this with 70 years of common sense, balanced trait selection, linebreeding, and selecting for strong maternal lines that are fertile and easy fleshing, well pigmented, and great uddered, and it adds up to bulls that will add tremendous value to your herd in all phases of beef production.

These bulls were again fed out on the CHS Feeds ration called Holden Bull Challenger. It is a high fiber, low fat pellet that we have fed for the last 20 years. The bulls gained over 3.5 lbs. a day on a 120 day gain test and have an average 205 day weight of 725 lbs., an average 365 day weight of 1325 lbs. and an average scrotal of 37 cm. They also scanned an average REA of 13.49, and an average IMF score of 2.92%.

Scrotal Measurements were taken on 1-8-2025 before most of these bulls were a year of age.

# KA-CHING.

MORE POUNDS. MORE CALVES. MORE PROFIT.

Hereford bulls increase net profit by \$51 per cow per year. That's \$20,000 in additional revenue for a typical 400-cow outfit, thanks to increased fertility and herd size. Herefords are also the efficiency experts, proven to add value to calves in the feedyard — \$30 per head in profitability. That's real money and real results.

**COME HOME TO HEREFORD.**

**PREMIER HERD BULL PROSPECT**

Don't overlook this bull because of his age. He is an absolute stud and his dam is one of the top donors that we have ever raised. We are excited to add him into our herd bull battery. Ask us to show you his maternal sister in our first calf heifers. She is fantastic

- ♦ #1 bull in the sale on WW and YW EPDs and top 1% on both
  - ♦ Top 4% on Scrotal, CWT, and \$CHB and top 15% on MARB
  - ♦ Maternal brother sells as Lot 4028M
- Retaining 1/2 interest and 1/2 possession

### 18 MONTH OLD FALL BULLS

This group of fall bulls is the top 34 out of 50 bulls born in our fall 2023 calf crop. There is exceptional depth of quality in this big, stout, well marked set of bulls. There are some definite top end herd bull prospects in this group, and full brothers to some of the feature yearling bulls. The average EPDs of this group are

**CED +4.4 BW +2.4 WW +59 YW +92 Scrotal +1.2 Milk +13 REA +.42 MARB +.21 BMI\$ 398 CHB\$ 133**

Please note that the adj. 205 and 365 day weights on these bulls are not comparable to the yearling bulls. They are raised in a totally different environment with no green grass while they are on their dams and a lot of winter weather. They are also developed after weaning out in big pastures on grass and fed for a lower gain. They are bulletproof, sound, and ready to go breed a lot of cows and cover the country.

All of these bulls also have GE EPDs, are parentage verified, and semen checked. They are a great combination of pigment, eye appeal, performance, carcass, and maternal with many ET bulls in the group.

Check out this bull out of the 0176H herd sire. He is soft made, easy fleshing, extra thick, and extremely docile. He is red necked, red to the ground, and measured a huge scrotal. This bull will catch your eye immediately when you walk into the pen. He performed extremely well boasting a 101 NR and a 106 YR. Dam is a very productive 2022Z daughter that has raised 2 calves at a 105.5 NR and 2 at a 106.5 YR.

Check out this son of the carcass king 0159H! This bull is ultra correct and moves like a cat. He has extra length of spine, depth, and is marked ideally. On top of a great look, this bull backs up impressive carcass EPDs with a very impressive set of scan data. The full sisters to this bull, that we have in production, are extremely good uddered, did phenomenal jobs with their first calves, and will find their way into the donor pen this year. There is extra carcass merit and maternal strength in this package. 3325L's dam, 8123F, is now a top donor at Topp Herefords in North Dakota.

**Take advantage of hybrid vigor by capitalizing on Hereford genetics.**

**AMERICAN HEREFORD ASSOCIATION**  
**MA+**  
**MATERNAL ADVANTAGE**

The Maternal Advantage program identifies females with added longevity, fecundity, increased fertility and more calves per year.

They can be utilized by producers using Hereford bulls on British-based cows or Brahman-based cows in their breeding program.

Producers utilizing the program will have access to a sire EPD summary, added genetic merit, replacement selection tools, genetic testing tools and access to AHA resources, and more staff.

**Eligibility Requirements**

- Producers must verify that eligible females are sired by Hereford bulls with transferred ownership.
- Eligible bull batteries must rank in the top 50% for Baldy Maternal Index (BMI\$) if used on British-based cows or the top 50% of the breed for Brahman Influence Index (BI\$) if used on Brahman-based cows.

This donor prospect out of the carcass king 0159H is an awfully impressive individual. She is red to the ground with good pigment, has a huge hip and a lots of body. 4068M is a maternal sister to the 2116K herd sire, and a full sister to the Lot 4027M bull. This pedigree is absolutely loaded with proven donors. The 0159H daughters here have performed extremely well and have fantastic udders. To top it all off, she combines calving ease, performance, and carcass merit. Go find this female, she is a big time donor prospect.

Here is an opportunity to get one of the first 241K daughters offered. This heifer is deep bodied, well marked, big hipped, and thick made. This low birth weight heifer performed extremely well, weighing over 900 pounds at a year. Dam has been a fantastic donor, and a full sister sold to Cooper Hereford Ranch in our last female sale. Very cool opportunity here to get into a heifer with tons of maternal strength.

**DOUBLE BIT RANCH HEIFERS**

This set of heifers came over from Double Bit Ranch in Libby, MT. Paul and Margaret Tisher have a fantastic breeding program utilizing both AI and ET. Their cowherd base all came from us to begin with, and it is a fabulous cowherd. We have flushed donor cows together that they originally purchased, and we also own the Cooper 0132H donor together. This set of heifers are outstanding. They only retained one heifer out of this group to keep and are offering all the rest in the sale. Help yourself to a great opportunity on this powerful set of heifers.

# Holden Herefords

[www.holdenherefords.com](http://www.holdenherefords.com)

Once again we are please to offer a couple of outstanding sets of true F1 black baldy open yearling heifers. These heifers have lots of pigment, are big ribbed, feminine, and should make a great set of cows. They are bangs vaccinated, have all pre breeding shots, unbranded, and ready to breed this spring.

**BB1**      **8 HEAD • 4390 - 4398**

This is a set of home raised heifers out of our Angus recipients and our herd sires. They were born in February and March and developed right with our replacements. They are big and powerful and will average close to 900 lbs. at sale time.

---

**BB2**      **9 HEAD**

These heifers were raised on the Billy VandenBos ranch next door to us. We have sold his baldy heifers the last 4 years, and they have worked out really well for the buyers. They are out of a top set of young Angus cows with a lot of Flesch Angus genetics and a top set of our bulls. This is the top cut of his heifers with no replacements kept. They are March and early April born heifers and should weigh 775 lbs at sale time.

---

**HERF 1-7**      **70 HEAD • 26 - 125**

This year we have added a new addition and decided to offer some Hereford heifers that we purchased from some of our long time customers. This set of heifers is the top 70 head out of 160 head that we purchased. They came from B Four Inc., Ginther Herefords, and Soap Creek Cattle Co. These heifers are all straight Line One and should make an exceptional set of cows. They have been getting fed out at Craig Broesders (B Four) and really look nice. They are all bangs vaccinated and have had all pre breeding vaccinations. They should weigh 800 lbs at sale time.

Can be purchased in groups of 10 or more, buyer has option to take as many as they want.

---

---

---

---

**Our operation is very blessed to work with a lot of talented people through the year. We thank them all and appreciate all that they do to help make our operation successful. We also have a great crew of friends and neighbors that show up to help get ready for the sale and pull off everything that it takes to make sure that everything goes well on our big day. Our hats are off to them all!!**

# Thank You!

# HETEROISIS PAYS

Economic and production benefits associated with heterosis are documented by decades of industry-wide research in commercial crossbreeding systems.

## DIRECT HETEROISIS

Increased performance of the crossbred calf relative to the average of the straightbred parental breeds.

- + 1.9% Survival to weaning
- + 3.9% Weaning weight
- + 2.6% Post weaning gain
- + 3.8% Yearling weight
- + 2.2% Feed conversion

## MATERNAL HETEROISIS

Increased performance of the crossbred cow relative to the average of straightbred females of the parental breeds.

- + 3.7% Calving rate
- + 3.8% Weaning weight
- + 38.0% Longevity
- + 17.0% Number of calves
- + 25.3% Cumulative weaning weight

Primary crossbreeding advantages are improvement of lowly heritable traits, such as those associated with reproduction, which are difficult to impact through direct selection pressure. Small, net-positive effects in multiple traits affecting commercial cow-calf profitability — pregnancy rate, calf livability, calf health, etc. — yield significant returns that are difficult to measure. Crossbreeding value is most visible in the increased number of calves (lifetime), cow longevity and cumulative weaning weight (lifetime).

### HEREFORD HETEROISIS PAYS MORE

Hereford genetics offer more crossbreeding power because they are the least related to other Bos Taurus breeds, as documented by the U.S. Meat Animal Research Center (USMARC) 2000 Bull Project. Plus, Hereford's unique, inherent genetic advantages compared to other breeds offer added breed complementarity, especially when crossed with Angus. Hereford advantages include: docility, fertility, feed efficiency in the pasture and feedlot, longevity, and production efficiency.

### HEREFORD-SIRED BLACK BALDY FEMALE ADVANTAGES:

- 7% higher pregnancy rate
- More calves weaned per cow exposed

<sup>1</sup>On average, Oklahoma State University researchers measured about 2 pounds per day less moderate-quality forage (Oklahoma pasture) intake in the black baldy cows. On an annual basis the black baldy cows would be expected to consume about 725 pounds less forage.

<sup>2</sup>Calculation based on breed differences for feed efficiency documented by the U.S. Meat Animal Research Center, using current feed costs (Oct. 2022).

- \$51 more per cow per year in net present value (2009 calculation)
- 3.5% more average rate of return on assets
- 2 pounds less pasture forage per day while maintaining more body condition<sup>1</sup>

Black baldy cows require 1 acre less of moderate-quality forage per year compared to straightbred black Angus peers, according to Oklahoma State University research.<sup>1</sup>

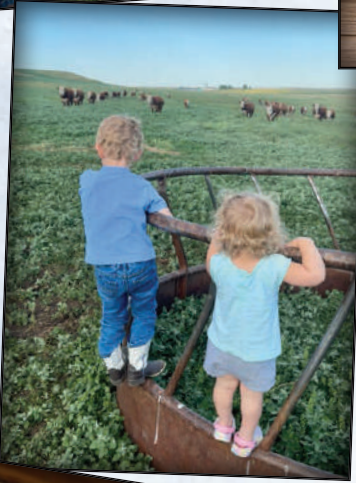

### HEREFORD-SIRED BLACK BALDY STEER ADVANTAGES:

- Heavier weaning weights
- Increased feed efficiency
- Lower cost of gain
- Lower feedlot breakeven
- \$28 per head less feed cost across finishing period

Based on feed efficiency alone — breed differences documented by the USMARC — Hereford has a \$51 per head advantage over the finishing period, when compared to Angus.<sup>2</sup> Hereford's economic advantage increases as feed costs rise.
