**MONDAY, MARCH 9, 2020**

*LUNCH 11:30 • SALE AT 12:30*

*AT THE RANCH IN VALIER, MONTANA*

# View Holden Hereford's Sale Live on Satellite TV with Superior

## HERE'S HOW IT WORKS

**HOW TO PARTICIPATE AS AN ABSENTEE BUYER** - We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at [www.superiorlivestock.com](http://www.superiorlivestock.com).

**Turn in Bids Over the Phone.** This is our traditional method of buying livestock and is the suggested process for anyone who does not have consistent, high-speed internet. To get started simply go online to [www.superiorlivestock.com](http://www.superiorlivestock.com) and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form. Fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

**Click-To-Bid.** This is Superior's online bidding program for cattle buying. Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to sign up. Becoming a member is easy – just go to the homepage of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved by the ranch you will receive an e-mail confirming which sale you are now registered for.

**Viewing the Auction.** The sale will be broadcast via satellite on SLA-TV (DISH Network channel 997). Please note that there is a delay if you are watching the auction on television so be sure to call in a couple lots ahead of the lot you are interested in bidding on. The sale will also be broadcast live in Hi-Definition on the internet at both [www.superiorlivestock.com](http://www.superiorlivestock.com) and [www.superiorclicktobid.com](http://www.superiorclicktobid.com). The video feed on the homepage of [www.superiorlivestock.com](http://www.superiorlivestock.com) looks the same as the video feed on TV and can be watched over a smartphone or tablet. Remember you can call in to bid whether watching on the TV or on the internet, but you must be a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to "click-to-bid".

**Buyers will be contacted by the ranch after the sale for payment and delivery details.**

**IF YOU NEED ANY ASSISTANCE CALL SUPERIOR AT (800) 422-2117.**

Find our interactive catalog in the free Ballyhoo Go! app. Take notes, compare and filter bulls, watch videos, see animal data on the Association site, and more all in one place.

**See details on page 56**

## View and Bid Live on the Internet

Real-time bidding is available via the internet for this sale. Live audio and live video will allow buyers to bid on animals just as if they were present at the sale. Buyers must create an account prior to the sale.

Please visit [www.LiveAuctions.tv](http://www.LiveAuctions.tv) to create an account and request a buyer number. Instructions are available at [www.LiveAuctions.tv](http://www.LiveAuctions.tv) to walk you through the account setup process.

Buyers who would like to bid via the internet must register with [LiveAuctions.tv](http://LiveAuctions.tv) two days prior to the sale.

### TERMS AND CONDITIONS

- ✦ All sale cattle have been parentage verified and DNA tested to be IE Free, HY Free, Dilutor Free, and MSUD Free by GeneSeek Labs.
- ✦ Each animal will be sold to the highest bidder without reservation.
- ✦ The auctioneer will settle any disputes as to bidding and his decision will be final.
- ✦ Terms of all sales will be cash unless arrangements are made between purchaser and seller prior to sale.
- ✦ Individual health papers will be furnished with each animal permitting shipment to any state.
- ✦ In case an adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit on the purchase of another animal.
- ✦ No adjustments will be made after nine (9) months of sale day on any animals.
- ✦ The animal becomes the property of the purchaser as soon as sold but it shall be the responsibility of the seller to see that animals are properly cared for until delivered to the purchaser.
- ✦ Any death or injury after the animal is sold is at the buyer's risk.
- ✦ Anyone attending this sale attends at their own risk and without liability on the part of the owners or their employees.
- ✦ Corrections or additions of any information contained in the sale catalog will be announced from the auction stand and will take precedence over any printed material.

This is our invitation for you to attend our 54th Annual Production Sale. On behalf of our operation, we welcome you to come and see what we feel is an exceptional sale offering. We feel the depth of quality in this group is absolutely outstanding. It's hard to believe that it has been almost 55 years since the first Cooper-Holden Production sale that was held in 1967 in Great Falls, MT. We feel very blessed to still be involved in the Hereford business, and are very grateful for all the wonderful friends and customers we have had experiences with over these last 54 sales. The Hereford business has been great to us over the years, and it is exciting to see the interest focused back on quality Hereford cattle out in the beef industry today. The data is in and Herefords continue to excel in all research programs for both heterosis and extra profit for your operation. We have enjoyed our part in working to produce Hereford cattle that will perform well in all segments of the beef industry, and we look forward to many more years of raising the best Herefords possible. As always, we plan on laying out the welcome mat with great hospitality and top quality Hereford cattle on display, and we truly hope you can join us at sale time.

Once again, we are pleased to offer an outstanding set of bulls that are uniform and predictable in quality, type, and breeding. This group represents the top 120 out of almost 160 bull calves born in our 2019 calf crop and almost 50% of them are the results of our extensive ET program. In addition, we are selling a tremendous set of powerful 18 month old bulls from our fall calving program. They are the top 60% of the fall 2018 calf crop. They are a balanced trait set of bulls that combine thickness, performance, pigment, maternal strength, fleshing ability, carcass, disposition, eye appeal, and moderate birth weight. Almost 80% of the sale offering qualifies as sires for the Hereford Advantage program by being in the top 50% of the breed on CHB\$ (\$101 and above), and over 50% of the sale offering ranks in the top 15% of the breed on CHB\$ and also the top 15% on Milk EPD. Also, 100% of the sale offering have GE EPDs on them to improve the accuracy of their EPDs. We have embraced the use of Genomics in our herd to give our customers better EPD data on our cattle, are one of a small group of herds in the U.S. that have been genomic testing every animal since 2012. The bulls will also sell with complete ultrasound and performance data and they have all passed a semen test by our vet. We also have a great set of elite Line One females in the sale again this year. There are 4 outstanding ET heifers, fall pairs with heifer calves, a top quality set of 20 open yearling heifers, and for the first time ever we will offer 10 extra fancy F1 black baldy open heifers in our sale. All registered sale cattle have been DNA parentage verified and tested free for all known genetic defects. As always, all sale cattle sell fully guaranteed.

Our cow herd is Line One in breeding. We purchased our first Line One cattle over 60 years ago. Since then we have purchased and used many top sires from the Miles City Research Station. We have also exchanged and purchased top herd sires from Cooper Herefords. We have also selected top herd sire prospects from our own herd every year.

We were one of the first members of the Montana Beef Performance Association when it was organized in 1956 and were very active in it until it was dissolved. We have been involved with the TPR program of the American Hereford Association and are active participants in the Whole Herd Reporting Program. These records have been very important in selecting and maintaining the performance and quality of our cattle. We have a severe culling program for our mother cows. We cull on performance, fertility, soundness, udder quality, and milk. Our cattle are the product of many years of selection for these traits. Our cowherd is our pride and many of the top cows in the breed have come from our ranch.

We have stayed with a strong performance, multitrait line breeding program to enhance the predictability of our cattle for our customers. Our focus has always been on stacking generation after generation of the traits that add value to our customer's bottom line. A line breeding program can only succeed if you continually add cattle with superior genetics to it. The advantage of our program is the uniformity and predictability it provides along with the heterosis that can be generated by an outcross within the breed or between breeds. These bulls have generations of bred in performance and will pass these traits on to their progeny consistently.

The sale bulls and heifers and the cowherd will be on display March 7th, 8th, and 9th for your inspection. Lunch and snacks will be provided on both March 8th and sale day. . There will be a social hour and prime rib dinner at Buffalo Joe's Steakhouse in Dupuyer on March 8th from 6:00-8:30 p.m.

We are excited to once again be broadcasting our sale live with Superior Productions on their new SLATV Channel, which is Dish Network Channel 997. We will start selling cattle promptly at 12:30 p.m. to try and get through all the sale lots in our allotted time. DVD's of the sale cattle will be available through us, The Livestock Link, or Superior Productions. Videos will also be viewable on the internet on all of our websites.

Thank you for your interest in our program. Please feel free to stop by and inspect the cattle at any time, and if we can help you out in any way, please give us a call.

Jack & Tresha Holden & family, Jay D. & Kelli Evans & family

[www.holdenherefords.com](http://www.holdenherefords.com)

**DELIVERY**

We are offering free delivery to central points within 1,000 mile radius of our ranch on all purchases totaling \$5000 or more. Cattle will be delivered to anywhere in the continental U.S. but will be at buyer's cost after the first 1000 miles.

**ABSENTEE BIDDING**

Anybody wishing to bid that cannot attend the sale or participate through Superior Livestock or LiveAuctions may place a phone bid by calling any listed sale representative, Jack Holden, Jay D. Evans, Eric, or Brad. Please contact us if we can be of assistance in any way.

**TRAVEL AND ACCOMMODATIONS**

Our ranch is 95 miles north of Great Falls, Montana. Great Falls has excellent air terminal service. Great Falls is served by Delta, United, and Alaska airlines.

3297A has been an impressive bull from day one, and he has proven to be a great breeding bull. He sires extra pigment, rib shape, muscle expression, length of body, and loads of eye appeal. He is a big time performance, maternal, and carcass bull whose progeny are full of red meat. His dam is a top donor cow that is now owned by Hayden Hoffman, and he is a maternal brother to the 5107C bull that topped our sale at \$160,000 in 2016. He ranks in the top 15% on WW, TEAT, and MARB EPDs, the top 4% or higher on YW, Milk, M&G, and REA EPDs, and the top 1% on CWT EPD and CHB\$. **16 powerhouse, well marked sons sell!**

**HH ADVANCE 5018C ET**

Goggle eyed, big ribbed, long bodied, and thick made bull out of the great 3006A sire. This is our first set of sons to sell out 5018C and they are outstanding. His dam was a top donor cow that we purchased in the Baker Dispersal. She was perfect uddered, high volume, and very easy fleshing. The 6092D bull used in our program is a maternal brother to 5018C also. 5018C is a curve bender that ranks in the top 25% on BW and WW EPDs and the top 10% on Milk EPD. His progeny are the right kind! **7 big ribbed, well marked sons sell!**

5107C was the \$160,000 high selling bull from our 2016 Sale and is also a maternal brother to the 3297A sire. He is a son of the popular 215Z Cooper bull and is breeding the same curve bending numbers as 215Z. He throws extra muscle, thickness, eye appeal, growth, length of body, and carcass. He ranks in the top 15% on BW, TEAT, MARB, and REA, the top 10% on YW and M&G, the top 3% on WW, and the top 1% on CWT EPD and CHB\$. We are very impressed with the job he is doing in our herd. **11 extra fancy sons sell!**

**HH-ADVANCE7088E**

We retained 7088E from our 2017 calf crop and are extremely pleased with the job he is doing. He sires well made, short marked, high performance carcass cattle with extra eye appeal. The first sons of 7088E averaged 141.8 on IMF ratio. His dam is a top donor out of 0132X and a maternal sister to the 8120F bull that topped our 2019 Sale. Maternal grandam is an elite donor with exceptional carcass, udder, and teat EPDs and she is a maternal sister to the 710E bull in use at Cooper Herefords. 7088E ranks in the top 1% on WW EPD, the top 20% on REA, and the the top 3% or higher on CW and MARB EPDs and CHBS. **5 powerful, high carcass sons sell!**

## EXPLANATION OF BREED EPDS

### CALVING EASE- DIRECT (CED)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

### BIRTH WEIGHT (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

### WEANING WEIGHT (WW)

Weaning Weight (WW) WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

### YEARLING WEIGHT (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

### Scrotal Circumference (SCR)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a 0.7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.

### MATERNAL MILK EPD (MILK)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

### MATERNAL MILK & GROWTH (M+G)

Maternal Milk & Growth reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. A bull with a 29 lb. M&G EPD should sire daughters with progeny weaning weights averaging 19 lb. heavier than progeny of a bull's daughters with a M&G EPD of 10 lb. (29 minus 10 = 19 lb.). It is equal to one-half the sire's weaning weight EPD, plus all of his MM EPD. No accuracy is associated with this since it is simply a mathematical combination of two other EPDs. It is sometimes referred to as "total maternal" or "combined maternal."

### TEAT SIZE (TEAT)

TEAT EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

### RIBEYE AREA (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

### MARBLING (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

### Certified Hereford Beef Index (\$CHB)

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Rib-eye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

# AHA GE·EPD

## The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

\* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

### YEARLING BULLS

This group of yearling bulls represents the top 75% of the bull calves born in our 2019 calf crop. We feel they are one of the best sets we have ever offered for sale when you combine EPDs, phenotype, performance, carcass, strength, and cow power. The quality and uniformity in this group from top to bottom is outstanding. They are stout made, well marked, and have top notch performance and ultrasound data to back it up. They have all been semen checked and are ready to go to work for you. 100% of these bulls have AHA GE EPDs to increase the accuracy of their EPDs, and they also are all parentage verified and tested negative for all genetic defects. We invite you to look them over, and we feel that you will be very impressed with the consistency in type and kind in this powerful set of bulls. There are many full and 3/4 brothers in this group also, and almost 50% are ET calves from our extensive ET program.

**The average EPDs on this group of bulls is**

**CED +5.3 BW +2.9 WW +57 YW +89 Scr +1.1 Milk +29 M&G +57 Teat +1.4 REA +.38 MARB +.16 CHB\$ 111**

Compare this to these breed averages and you will see how strong this group is on all traits across the board

**CED +2.2 BW +3.0 WW +51 YW +83 Scr +0.9 Milk +23 M&G +49 Teat +1.23 REA +.35 MARB +.08 CHB\$ 101**

**The average bull in our sale offering ranks as follows:**

**Top 25% CED, Top 25% WW, Top 30% YW & Scrotal, Top 15% Milk and M&G, Top 10% TEAT, Top 25% MARB, Top 15% CHB\$**

Combine this with 60 years of common sense, balanced trait selection, linebreeding, and selecting for strong maternal lines that are fertile and easy fleshing, well pigmented, and great uddered, and it adds up to bulls that will add tremendous value to your herd in all phases of beef production.

These bulls were again fed out on the CHS Feeds ration called Holden Bull Challenger. It is a high fiber, low fat pellet that we have fed for the last 20 years. The bulls gained over 3.5 lbs. a day on a 130 day gain test and have an average 205 day weight of 730 lbs., an average 365 day weight of 1295 lbs. and an average scrotal of 36 cm. They also scanned an average REA of 12.58, an average IMF score of 3.22%, and an average REA per 100/wt. of 1.03 with an average Backfat of .29 inch.

Scrotal Measurements were taken on 1-21-2020

We went back and used the 7034T sire on the 7088T cow to try and raise a full sister to 1126Y, but got a bull instead. This big, stout scamp has a little extra chrome but he is powerful!

- ◆ Weaned at 800 lbs.
- ◆ Full sister has produced multiple herd sires and over \$200,000 in progeny sales.

**EXCEPTIONAL BODY AND MUSCLE**

As Joe Goggins would say "Look at the body on that bull". 9073G is a massive middled, big hiped, stout boned, well marked bull out of one of my favorite cow families. Two maternal sisters will be donors for us this spring and they are exceptional young cows. Dam is a role model brood cow that goes back to the great 1028L cow that may be my favorite female we have ever produced. Here is a great all around prospect!

- ◆ Weaned at 830 lbs. and ratioed 145 on IMF
- ◆ Maternal sisters are the dams of feature bulls 9094G and 9103G
- ◆ Top 20% on REA and top 10% on MARB EPDs

**CARCASS QUALITY KING**

9076G recorded the highest IMF score at 6.33% that we have had in 26 years of ultrasound. He is a powerful performance bull with excellent pigment, big testicles, extra length of body, and is out of a perfect uddered donor cow. He is a grandson of the 0121X donor cow that has produced so many top herd bulls and donor females, and she is the matriarch of one of the top MARB cow lines in the breed. If you want to add carcass quality and cow power combined with an outstanding phenotype, 9076G is a bull to take a hard look at.

- ◆ Ratioed 105 on REA and 192 on IMF
- ◆ Top 10% on UDDR and TEAT EPDs
- ◆ #5 bull in the sale on adj. 365 wt. at 1447 lbs.
- ◆ 9076G ranks as the #1 2019 born Horned bull in the breed on MARB EPD that has scan data and GE EPDs. He has the highest MARB EPD of any bull that we have ever raised.

**ELITE HERD BULL PROSPECT**

9252G is the only 3006A son selling in the sale this year but he is a stud. He is an eye catcher with excellent pigment and markings. He is big middled, thick butted, deep flanked, super correct, and fantastic in how he comes out of his front shoulder. Dam was a pick of the flush heifer that sold for \$32,000 in our 2018 Sale and she is a special young donor. When you combine phenotype, cow family, and his exceptional EPD profile, 9252G has loads of genetic potential. He was raised at a different location and weaned later than our bulls and still excelled.

- ♦ 38 cm Scrotal and very top 1% on Scrotal EPD
- ♦ Top 4% on Milk and M&G EPDs
- ♦ Top 10% on WW, YW, and MARB and top 20% on BW EPDs
- ♦ Maternal sister sells as Lot 9055G. She is a sale feature also.

## 18 MONTH OLD FALL BULLS

This group of fall bulls are the top 19 out of almost 40 bulls born in our fall 2018 calf crop. There is exceptional depth of quality in this big, stout, mature set of bulls and some definite front pasture herd sire prospects in the group. The average EPDs on this group are CED +5.8 BW +2.3 WW +50 YW +80 Milk +30 M&G +56 REA +.36 MARB +.19 CHB\$ 115

All of these bulls also have GE EPDs and are parentage verified and semen checked. Over 1/2 of these bulls are ET calves out of some of our top donors and are maternal brothers to some of the yearling bulls. They are a very well marked, set of bulls that will add pigment, performance, carcass, and maternal strength to their progeny. They are big and stout and developed to go cover a lot of country and breed a lot of cows.

**YEARLING HEIFERS**

We are pleased to once again offer a top quality set of yearling heifers. This year we again decided to add more of our top ET heifers to enhance the sale offering. We also have a special feature in selling the natural calf out of our high selling heifer from our 2018 Sale. This is a great set of heifers all the way through and there are some definite future donors and foundation females in this group.

Here is a heifer that we are kicking ourselves for even offering for sale. We lost this heifer's dam after an injury so won't be able to get anymore females from this line. 9006G is a broody, deep ribbed, feminine fronted, power heifer out of 5110C. Dam had tremendous volume, thickness, and udder quality. We had flushed to the old 1045Y bull to add his tremendous carcass strength and doability. 9006G's dam was the only female we raised out of him. Look this heifer up on video or at sale time. She is special.

 HH ADVANCE 7034T ET  
 HH MISS ADVANCE 5139R ET

Feminine made, fancy fronted heifer out of our pick of the heifers that sold at Harrison Cattle Company last spring. Dam is perfect uddered and looks like she will make a great cow.

- ◆ Top 4% on MARB EPD and CHB\$
- ◆ Top 10% on WW EPD and top 15% on Milk

### LOTS BB1 AND BB2

This year we are offering a set of 10 true F1 black baldy open yearling heifers. This is a powerful set of females that will be averaging over 850 lbs. at sale time. They have lots of pigment, are big ribbed, feminine, and should make a great set of commercial cows. They are bangs vaccinated, had all shots, and are unbranded.

They are all sired by HH Advance 6337D, a HH Advance 1013Y son that was a powerhouse out of a top Miles City donor cow. Buyer of the first lot has the option to take all 10. We will not be able to provide free delivery on this group but will do our best to help get them to their destination at cost.

### BB1

### BB2

## FALL PAIRS

We are selling a small but select group of fall pairs this year with some fantastic heifer calves on them. With the exception of one female they are all 2 and 3 year olds. On the older 3 pairs, we will sell choice of cow or heifer calf. Buyer can pick either one or double their bid and keep the pair together. On the two heifers with younger calves we will sell the pair as one. They were exposed to HH Advance 7143E ET or CL 1 Domino 8232F. Confirmed pregnancy status will be available at sale time.

Here is another 3 in 1 lot that should turn out great. 7358E is a long bodied, powerhouse female with a great udder. 9361G is very attractive, well marked, and extra feminine.

**SPECIAL SEMEN LOT**

Here is another opportunity to be one of the first breeders to use our new junior herd sire HH Advance 8132F. This unique young sire combines tremendous curve bending EPD's that rank him in the top 4% of the breed on CED, BW, Scrotal, and MARB and the top 10% on Milk EPD. He has a flawless phenotype with a huge hip, big top, full pigment, and he is very clean made through his front. There is only one other horned bull in the breed with GE EPD's that can match him for his combination of CED, BW, WW, YW, MARB, and CHB\$. We offered 100 straws in our fall female sale and it was very well received and averaged \$310/straw. These 5 packages will be the only 8132F conventional semen offered for sale before the fall of 2020.
